C. D. Denson: Predictions of the Spriggs Viscoelastic Model for the Biaxial Extensional Viscosity 377

Issue No. 3

SPECIAL ISSUE - Symposium on Fiber Rheology and Spinning, held at the 42nd Annual Society of Rheology Meeting, October 27–28, 1971, at Knoxville. D. C. Bogue and J. L. White, Editors

Preface to Symposium Papers 381

F. N. Cogswell: Measuring the Extensional Rheology of Polymer Melts .. 383

Joachim Meissner: Development of a Universal Extensional Rheometer for the Uniaxial Extension of Polymer Melts 405

D. D. Joye, G. W. Poehlein, and C. D. Denson: A Bubble Inflation Technique for the Measurement of Viscoelastic Properties in Equal Biaxial Extensional Flow 421

C. D. Han and R. R. Lamonte: Studies on Melt Spinning Part I. Effect of Molecular Structure and Molecular Weight Distribution on Elongational Viscosity 447

I-J. Chen, G. E. Hagler, L. E. Abbott, D. C. Bogue, and J. L. White: Interpretation of Tensile and Melt Spinning Experiments on Low Density and High Density Polyethylene 473

J. A. Spearot and A. B. Metzner: Isothermal Spinning of Molten Polyethylenes 495

Y. T. Shah and J. R. A. Pearson: Stability Analysis of the Fiber Spinning 519

J. E. Spruiell, D. E. McCord, and R. A. Beuerlein: The Effect of Strain History on the Crystallization Behavior of Bulk Poly(Ethylene Terephthalate) 535

R. L. Smith, R. Pieters, and M. E. Morrison: Fundamentals of False-Twist Texturing of Thermoplastic Continuous Filament Yarns 557

Issue No. 4

Lawrence H. Gross and Bryce Maxwell: The Limit of Linear Viscoelastic Response in Polymer Melts as Measured in the Maxwell Orthogonal Rheometer 577

R. M. Christensen: Restrictions Upon Viscoelastic Relaxation Functions and Complex Moduli 603

Hsiu-Lin Yuan and G. Lianis: Experimental Investigation of Nonlinear Viscoelasticity in Combined Finite Torsion-Tension 615

Mototsugu Sakai, Hisashi Fukaya, and Mitsuru Nagasawa: Time Dependent Viscoelastic Properties of Concentrated Polymer Solutions 635

D. Acierno, G. Titomanlio, and G. Marrucci: Internal Viscosity Effects on Transient Elongational Behavior of Dilute Polymer Solutions (Elastic dumbbell model) 651

John Vlachopoulos, Michihiko Horie, and Stathis Lidorikis: An Evaluation of Expressions Predicting Die Swell 669

Ko Higashitani and W. G. Pritchard: A Kinematic Calculation of Intrinsic Errors in Pressure Measurements Made with Holes. 687

C. D. Denson: The Drainage of Non-Newtonian Liquids Entrained on a Vertical Surface 697

HSIAW-CHIN YEN and L. V. MCINTIRE: Finite Amplitude Dynamic Motion of Viscoelastic Materials 711

OLAGOKE OLABISI and MICHAEL C. WILLIAMS: Secondary and Primary Normal Stresses, Hole Error, and Reservoir Edge Effects in Cone-and-Plate Flow of Polymer Solutions 727

NOBUYUKI NAKAJIMA, CASPER F. STARK, and YOUNG J. KIM: Extrusion Rheology of Lubricated Polytetrafluoroethylene 761
